

2008 CALIFORNIA STATISTICAL ABSTRACT

Arnold Schwarzenegger, Governor
State of California

Issued January 2009

PREFACE

This is the 48th edition of the California Statistical Abstract, a compilation of data on social, economic, and physical aspects of the State. The volume is a cooperative effort of various government agencies, coordinated and issued annually by the California Department of Finance, Economic Research Unit.

The contributor for each table is given at the bottom of the table and may be contacted for more details or an explanation of the data. The Department of Finance welcomes comments on the Abstract and ways in which it may be developed into an even more useful compilation of data on the State.

INTRODUCTION

California covers 163,696 square miles between the 32nd and 42nd parallels north latitude on the Pacific coast. There are 840 miles of general coastline. The State is well known for its temperate climate which has attracted millions of people to the coastal cities. Los Angeles-Riverside-Orange ranks as the second largest consolidated metropolitan area in the United States, and San Francisco-Oakland- San Jose as the fourth. California includes Mount Whitney, the highest peak in the contiguous United States, 14,494 feet above sea level, and Death Valley, 282 feet below sea level, the lowest point in the Western Hemisphere. The average July maximum temperature ranges from 63 degrees in Eureka to 99 degrees in Redding.

Population--During the century following 1860, California's population approximately doubled five times or once each 20 years. However, with such a burgeoning base count, this rate could not be sustained. During the 10-year period since 1998, the net annual civilian migration has varied from a high in 2001 of 394,000 to a low of 120,000 in 1998. From July 1, 1998 to July 1, 2007, the total population increased by 4,923,000 or 15 percent.

Labor force and employment--California's civilian labor force averaged 18,188,000 for 2007, an increase of 281,000 or 1.6 percent, from 2006. Civilian employment increased by 179,000 to 17,209,000 and unemployment increased by 102,000 to 979,000. The resulting unemployment rate increased to 5.4 percent from 4.9 percent in 2006.

Gross domestic product--California's gross domestic product for 2007 was \$1.813 trillion, 13 percent of the U.S. total.

Personal income--Personal income of California residents reached \$1.520 trillion in 2007, 13 percent of total U.S. personal income. About 54 percent of the total was received as wages and salaries. Together, services and manufacturing accounted for almost 60 percent of the total wage and salary disbursements.

Corporate income--Net income less net loss of \$140 billion was reported by the 684,363 banks and corporations operating in the State during the 2006 income year. Manufacturing, trade, and finance industries accounted for over one half of the total net income.

Manufacturing--California has the largest manufacturing complex in the Nation. According to the 2006 Annual Survey of Manufacturers, value added during that year amounted to \$238 billion. The state's defense industry remains the largest in the U.S. and claimed 13 percent of all defense prime contracts in fiscal year 2005, in addition to substantial production for the civilian sector.

Agriculture--California continues to be the nation's leading agricultural producer. Cash receipts from marketings received by California farmers during 2007 totaled \$37 billion.

Foreign trade--The most widely used trade data come from the value of exports and imports that move through ports, regardless of where exports were actually made or where imports are consumed. In 2007, exports and imports increased by 7.9 percent and 3.7 percent, respectively. An alternate foreign trade measure, available for exports only, tracks goods from the state of manufacture or origin. Exports of California-made goods totaled \$134 billion in 2007, an increase of 5 percent from 2006.

Metropolitan areas--Effective June 6, 2003, three new categories of metropolitan areas have been introduced. Some changes were made to the actual make-up of several metropolitan areas. In California, there are four Metropolitan Divisions that combine into two Metropolitan Statistical Areas (MSA's), one in Southern California and the other in the Bay Area. These four divisions account for about half of California's total population. There are now 24 MSA's consisting of 30 counties and ten counties that are designated Micropolitan Statistical Areas. A new set of areas called Combined Statistical Areas (CSA's) was formed which combines adjacent Metropolitan and Micropolitan Statistical Areas, in various combinations. Four CSA's were designated in California. More of the state is now part of defined metropolitan areas. Previously, 24 of the state's counties were not part of any metropolitan area. Now only 13 counties are not defined.

Counties--There are 58 counties in California. Much of the data in the Abstract are reported by county. For the user's convenience, a map is provided as well as a listing of California cities and their corresponding counties.

SECTION A AREA, GEOGRAPHY, AND CLIMATE

This section summarizes State land and water areas, temperature, and precipitation. The basic sources are the Federal agencies responsible for surveying and mapping the United States and for recording its weather. Information on Federal and State parks and monuments is reported by various government agencies.

SECTION B POPULATION

The tables in this section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Nation are also shown.

All figures on the total population of California for 1940 through 1969 are from publications of the United States Bureau of the Census. All estimates of the civilian population and estimates of the total population for the state and counties after 1969 were prepared by the Department of Finance and are based on the analysis of components of population change. Data used in the preparation of these estimates have been obtained from the Vital Statistics Section, Department of Health; Department of Education; the Immigration and Naturalization Service; United States Department of Defense; the Department of Motor Vehicles; and the United States Bureau of the Census.

In addition to the preceding data sources, the estimates for cities also use information supplied by the cities in California and their respective utility companies.

Also included in this section are selected data on population by race and age from the US Bureau of the Census and the California Department of Finance.

a/ Because of the implementation of a different rounding convention, historical data may differ from data in previous issues.

b/ Employment reported by place of work. Does not include farmers or unpaid family workers.

c/ Includes employees not identifiable by county.

d/ With the incorporation of the 2000 Census, geographical changes have affected historical data back to 1990. These changes include: the separation of Fresno and Madera counties; the separation of Napa and Solano counties; the joining of Santa Clara and San Benito counties, and the addition of Yolo County to the Sacramento MSA.

a/ Losses originating under policies effective in a given year are assigned to that year regardless of accident date.

b/ Excludes experience of self-insured employers.

c/ Total incurred losses include amounts paid as of valuation date and insurers' estimates of future payments for reported claims. Each year's losses are evaluated at different levels of maturity, therefore, it can be very misleading to compare information between different years.

d/ Includes both temporary and permanent disability indemnity costs in cases involving permanent disability.

e/ There were approximately 1,081 in 2000, 1,141 in 2001 and 1,150 in 2002, 1,438 in 2003, 1,409 in 2004, 1,369 in 2005, and 1,320 in 2006.

For private group employers there were approximately 2,696 in 2003, 2,695 in 2004, 2,652 in 2005, and 2,572 in 2006.

b/ Employment is expressed as an annual average and is derived primarily from the BLS-State Quarterly Census of Employment and Wages.

c/ Lost workday cases involve days away from work, or days of restricted work activity or both.

d/ Excludes farms with fewer than 11 employees.

e/ Data for mining (Sector 21 in the North American Industry Classification Systems, 2002 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities.

Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by MSHA.

a/ Incidence rates represent the number of nonfatal injuries and illnesses per 100 full-time employees and were calculated as $N \times 200,000 / (EH)$ where
 N = number of occupational injuries, illnesses, or lost workdays;
 EH = total hours worked by all employees during the calendar year; and
 200,000 = 100 full-time equivalent workers (40 hours per week, 50 weeks per year).

b/ Excludes farms with fewer than 11 employees.

SECTION D

GROSS DOMESTIC PRODUCT, INCOME, AND COST OF LIVING

This section presents data on Gross Domestic Product, business and personal income, minimum wage, poverty guidelines, consumer expenditures, and the Consumer Price Index.

Gross domestic product estimates are prepared by the US Department of Commerce, Bureau of Economic Analysis on an industry or gross product originating basis, and are shown in both current and constant dollars.

Estimates of personal income received by residents of each state are prepared annually by the Regional Economic Information System, Bureau of Economic Analysis, United States Department of Commerce.

Median income data and poverty statistics are from the US Department of Commerce, Bureau of the Census and the California Department of Finance's Demographic Research Unit.

Minimum wage data is provided by the California Department of Industrial Relation's Industrial Welfare Commission.

Lower living standard income levels and poverty guidelines originated from the US Department of Labor and US Department of Health and Human Services.

The buying habits (expenditures) of households and families are derived from the Consumer Expenditure Survey conducted by the US Bureau of Labor Statistics.

Data on business and personal taxable income are compiled by the California Franchise Tax Board's Statistical Systems Bureau. It should be noted that much of the state's personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing State returns or who are exempt from State taxation. Conversely, there are items of taxable income which are not included in the personal income concept, such as gains from the sale of assets. Therefore, the data reported on California personal income tax returns are strictly not comparable to those estimates of total personal income reported by the Department of Commerce.

The Consumer Price Index is published for three areas in California, the Los Angeles-Anaheim-Riverside CMSA (Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties), the San Francisco-Oakland-San Jose CMSA (Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma Counties), and the San Diego MSA (San Diego County). The index is also published for California and the United States.

The indexes for the United States, San Diego MSA, San Francisco-Oakland-San Jose CMSA, and Los Angeles-Anaheim-Riverside CMSA are compiled by the United States Bureau of Labor Statistics. The index for California is computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as a weighted average of the Los Angeles-Anaheim-Riverside CMSA, San Francisco-Oakland-San Jose CMSA, and from 1965-1986, San Diego MSA indexes.

^{a/} Includes returns received through approximately the end of December of the succeeding year. Table D-12, Comparison by County, is created from data derived from all current-year returns before audit.

Table D-10 is based on a stratified random sample prepared by the Economic and Statistical Research Bureau of the Franchise Tax Board.

Because of the different data sources, Tables D-10 and D-12 are strictly not comparable.

^{b/} For resident returns, Adjusted Gross Income (AGI) represents California AGI; for nonresident returns, AGI represents total AGI.

^{c/} For nonresident returns, Adjusted Gross Income (AGI) represents California-sourced AGI.

a/ Includes resident and nonresident taxpayers

b/ Changes in the Personal Income Tax Law effective with returns for the 1987 taxable year make prior year information not comparable.

c/ Prior to the 1991 taxable year, AGI included total federal AGI for nonresidents. Beginning with 1991, AGI includes only California-sourced AGI for nonresidents.

a/ Includes a slight amount of duplication as a result of mergers, consolidations, changes in corporate names and changes of income year, which necessitated filing more than one state franchise tax return during the year. In 1961, this duplication amounted to approximately 205 corporations, or 0.5 percent of the total.

b/ Includes corporations with fiscal years ending in the calendar year shown.

c/ Income of all corporations reporting net income.

d/ Income of all corporations reporting net loss.

California: Weighted average of San Francisco CMSA, Los Angeles CMSA and (from 1965-1986) San Diego indices.

Los Angeles CMSA: Includes the counties of Los Angeles, Orange, Riverside, San Bernardino, & Ventura.

San Francisco CMSA: Includes the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, & Sonoma.

a/ The U.S. Bureau of Labor Statistics rebased all CPI indices from 1967 to 1982-84 starting with the release of data for January 1988. Historical data were also converted to the new base to facilitate comparisons over time. While the index numbers are different, the percentage changes should be comparable.

b/ Computed by the Department of Industrial Relations, Division of Labor Statistics and Research as a weighted average of the indices for Los Angeles-Anaheim-Riverside, San Francisco-Oakland-San Jose and, from 1965-86, San Diego.

C/ Income that were previously reported for 2007 were in error. The correct figures are reflected herein.

a/ A family is a group of two people or more (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered as members of one family.

b/ A household includes the related family members and all the unrelated people who occupy a housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit is also counted as a household.

Note: Data for 1994 onward are not comparable to prior historical data because of the Current Population Survey redesign.

Footnotes:

a/ In 1972, Labor Code was amended to include men under coverage by IWC Orders.

b/ In 1942 and 1943, the California minimum wage was raised to \$0.45 per hour in 7 of the 10 orders then in effect; in 1943, it was raised to \$0.50 per hour in the remaining three orders.

c/ In 1961, IWC promulgated a new order covering women and minors in agricultural occupations. Minimum wage was raised to \$1.00 per hour for hourly-paid workers on farms employing 10 or more women and minors. Minimum wage was raised to \$1.30 per hour in 1965 and extended to both hourly and piece-rate workers on farms employing five or more women and/or minors. In 1968, a revised order was issued raising the minimum wage to \$1.65 per hour for women and \$1.35 per hour for 16 and 17 year old minors.

d/ In 1966, the federal minimum wage was amended. Workers covered before 1966: \$1.40 (2/1/67) and \$1.60 (2/1/68). Newly-covered employees: \$1.00 (2/1/67), \$1.15 (2/1/68), \$1.30 (2/1/69), \$1.45 (2/1/70), and \$1.60 (2/1/71). Agricultural workers: \$1.00 (2/1/67), \$1.15 (2/1/68) and \$1.30 (2/1/69).

e/ Extended to men, effective 3/4/74.

f/ In 1974, the federal wage was amended.

Workers covered before 1966: \$2.00 (5/1/74), \$2.10 (1/1/75), and \$2.30 (1/1/76).

Workers covered by 1966 and 1974 amendments: \$1.90 (5/1/74), \$2.00 (1/1/75), \$2.20 (1/1/76), and \$2.30 (1/1/77).

Agricultural workers: \$1.60 (5/1/74), \$1.80 (1/1/75), \$2.00 (1/1/76), \$2.20 (1/1/77), and \$2.30 (1/1/78).

g/ In 1976, all IWC orders, effective 10/18/76, provided \$2.50 per hour, except a rate of \$2.15 allowed for learners and minors, within limitations.

h/ In 1977, federal minimum in all industries, including agriculture, amended as follows: \$2.65 (1/1/78), \$2.90 (1/1/79), \$3.10 (1/1/80), and \$3.35 (1/1/81).

i/ In 1976, California Legislature provided short procedure for IWC to raise state minimum to federal minimum whenever federal goes higher. IWC issued Order MW-78, effective 4/1/78, to raise minimum to \$2.65 in 1978 and \$2.90 in 1979. IWC retained authority to set minimum wage higher than federal under regular procedures for amendment of orders.

j/ California minimum wage raised, effective 7/1/88.

k/ Federal wage raised to \$3.80 on 4/1/90 and \$4.25 on 3/31/91.

l/ Federal wage raised to \$4.75 on 10/1/96 and \$5.15 on 9/1/97.

m/ California's Prop. 210 passed in 11/97 election, increased California's minimum wage to \$5.00, effective 3/1/97 and to \$5.75, effective 3/1/98.

* The Tenth Revision of the International Classification of Diseases (ICD-10) codes may not be comparable to the Ninth Revision (ICD-9) codes. Caution should be used when looking at the number of deaths by year.

a/ Deaths shown above may not agree with deaths shown in vital statistics tables because some diseases are not listed separately in the International Classification of Diseases List of Causes of Death on which the vital statistics tables are based, or because the definitions of some of the diseases used in the International List differ from the definitions used for morbidity purposes.

b/ Non-A, Non-B is a new category added in 1982 by the Center for Disease Control, Atlanta, Georgia.

c/ Respiratory infections not included after 1988. After May 1989, cases reported only in foodhandlers, dairy workers and outbreaks.

d/ Prior subcategories combined for reporting beginning with 1993.

e/ Does not include NGU or PID.

f/ Also includes congenital, early latent, late and late latent syphilis.

g/ Chlamydia became a reportable disease in mid-1989; 1990 is considered the first full report year.

h/ Outbreak related cases only.

a/ Employers with substantial employment in multiple counties or industrial classifications are counted as a reporting unit in each county or industrial classification. An employer with only one business location and activity is counted as one reporting unit.

b/ As of the first quarter of 1987, approximately 80,000 active employers but with zero employment and wages, and not reported as out-of-business, were included as counted reporting units.

c/ A drop occurred in average reporting units for 1989. This is due to a purge of the employers reporting zero employment and no payroll for four consecutive quarters.

d/ The increase in average reporting units for 1991 is the result of the new Business Establishment List (BEL) reporting system. The definition of "multiple establishment employers" has been changed, causing more employment sites to be counted as reporting units.

e/ Due to changes in reporting methods made by the Bureau of Labor Statistics, data collected prior to 1992 are not entirely comparable to current data.

SECTION F EDUCATION

This section summarizes data relating to libraries, and to public and private education in California, both at the elementary and high school levels (kindergarten through grade 12) and at the collegiate levels (community colleges and universities or State colleges). The California State Department of Education has responsibility for accumulating and reporting data on public and private school activities for kindergarten through grade 12. The California Department of Finance and California Postsecondary Education Commission have responsibility for higher education statistics.

The source of library statistics is the California State Library.

a/ 1990 and later enrollment is a term-end rather than a first-census count.

b/ "Total University" includes Medical and Health Science enrollments.

c/ The totals do not include all institutions in the State. Reporting of enrollment is voluntary so totals reflect only those schools responding.

d/ Total number of persons employed, professional and support, expressed in full-time equivalent (FTE). Full-time is normally 40 hours per week but not less than 36.

e/ Total count of volumes held at end of fiscal year, June 30.

f/ Total annual out-of-building circulation, all materials, all units.

g/ Number of items borrowed by reporting library on interlibrary loan from other libraries. Includes photocopies sent in lieu of interlibrary loans.

h/ Number of items lent by reporting library on interlibrary loan (ILL) to other libraries. Includes photocopies sent in lieu of interlibrary loans.

i/ Annual total of questions answered by reporting library: questions, readers assistance, bibliographies, research projects, data base searches. Includes activities requiring use of library collections and services and/or training and experience of staff, but not simple directional questions.

SECTION G

RESOURCE INDUSTRIES

This section presents data relating to five basic resources of California: water, agriculture, forestry, fishing, and mining. The basic sources for these data are: the Department of Water Resources; Department of Food and Agriculture; Department of Forestry; Department of Fish and Game; and the Department of Conservation.

NOTE: This list of 107 dams includes those of at least 190 feet in height or with at least 100,000 acre feet of reservoir capacity. As of July 2008, there are 1255 dams within the safety jurisdiction of the State, which is exercised over dams which are at least 25 feet high and store more than 15 acre-feet, or which are over 6 feet high and store at least 50 acre-feet. Federally operated dams, 26 of which are listed here, are exempt from State safety supervision. Legal dam height is the vertical distance from maximum storage (often the spillway crest) to original stream bed at the downstream toe.

a/ A positive value of inventory change represents current-year production not sold by December 31.

A negative value is an offset to production from prior years included in current-year sales.

b/ Value of agricultural sector production is the gross value of the commodities and services produced within a year.

Net value-added is the sector's contribution to the national economy and is the sum of income

from production earned by all factors-of-production, regardless of ownership

Net farm income is the farm operators' share of income from the sector's production activities.

a/ Based on 1991-1994 field survey which is conducted in ten-year cycles, except timberland production zone.

b/ Timberland owned by the operators of farms.

c/ A zoning classification applied to private timberland by local government under the California Forest Taxation Reform Act of 1976.

TPZ land is taxed on a use-valuation basis with its usage limited to growing and harvesting timber and compatible uses.

The basic period for rezoning is a self-perpetuating 10-years.

SECTION H

MANUFACTURING

This section presents data on manufacturing industries summarized from the 2002 Census of Manufactures and the Annual Survey of Manufactures conducted by the US Bureau of the Census. Detailed information for individual industries and local areas are also available in the published reports of the Bureau of the Census.

Data on manufacturing reporting units by county and by number of employees are compiled from reports published by the Employment Development Department.

Information shown on California's defense-aerospace manufacturing sector is obtained from reports of the US Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the California Employment Development Department. Material from these and other sources has been summarized by the California Department of Finance.

a/ Implementation in 1991 of the new Business Establishment List (BEL) reporting system caused changes in the size categories from 1990 to 1991. The definition of "multiple establishment employers" has been changed, causing more employment sites to be counted as reporting units, and also increasing the numbers of reporting units in the smaller size categories.

b/ Establishments reporting employment covered by unemployment insurance during the third quarter (July-September) of each year.

a/ Manufacturing is defined as the mechanical, physical, or chemical transformation of materials or substances into new products.

The assembly of components into new products is also considered manufacturing, except when it is appropriately classified as construction.

b/ Only counties with 500 employees or more are shown, therefore county data will not add to State total.

c/ Withheld to avoid disclosing data of individual companies; data are included in higher level totals.

a/ Wage and salary workers.

b/ Beginning in 1990, industry employment are based on the new North American Industry Classification System (NAICS).

Data prior to 1990 are based on the Standard Industrial Classification (SIC) system. As a result, industry classifications will be different from those published in past years. The NAICS and SIC data are not comparable.

SECTION I CONSTRUCTION

This section presents annual data on California building permits issued for housing units, and the valuation of building permits issued for both residential and nonresidential units. Annual figures by county are also included. The sources of construction statistics are Security Pacific National Bank (through 1986) and the Construction Industry Research Board. The data on housing characteristics are provided by the US Bureau of the Census and the California Department of Finance. The California Association of Realtors is the source for the existing home sales price data.

SECTION J

TRANSPORTATION AND PUBLIC UTILITIES

This section presents selected transportation statistics and data summarizing the operations of public utilities.

The statistical data relating to highway transportation provide information on mileage, fuel distribution, construction and maintenance mileage, vehicle registrations, licensed drivers, and accidents.

Additional travel related information may be obtained from "Travel and Related Factors in California", published annually by the Department of Transportation, Office of Traffic Improvement.

In addition, this section contains California's electrical energy generation and sample utility bills for selected cities.

Note: The data in this table is based on corrections and updates as of July 30, 2008. With deregulation of the electric industry in 2001, California Energy Commission changed its data collection practice. Prior to 2001, utility-owned shares of coal, nuclear plants and some firm contract generation outside California were considered part of utility-owned generation category regardless of the physical location. In this tabulation generation located physically out-of-state is included in the energy imports category. The energy imports and exports include all electricity flows in and out of the state as reported by the four California balancing authorities: CAISO, LADWP, IID, and SMUD plus generation at four out-of-state power plants that are within one of these balancing authorities' control areas but physically located outside California. These plants include Intermountain Power Plant in Utah, Mohave Plant in Arizona (now closed), Caithness Dixie Valley Plant in Nevada and Termoelectrica Mexicali in Mexico. In previous versions of this table, these plants were reported as utility owned generation. Additional details can be found on the California Energy Commission website.

Sample bill usage assumptions:

Residential = Electric 500 kWh; Gas 120 CCF

Commercial, small = Electric 1,500 kWh; Gas 120 CCF

Commercial, large = Electric 10,000 kWh; Gas 602 CCF

Industrial = Electric 400 MWh; Gas 6,024 MCF

b/ Monthly bill figures do not include taxes or fees.

SECTION K TRADE AND SERVICES

This section presents information from the 1992 Economic Censuses on wholesale and retail trade, and services in California.

The 2002 Economic Census is also available and is presented in Section Q of this report. The 2002 Economic Census is based on the new North American Industrial Classification System (NAICS), whereas the 1992 Economic Census is based on the Standard Industrial Classification (SIC) system. As a result, comparison between census years may not be possible. Additional information is available from the US Bureau of the Census.

Also provided are data on taxable sales, licensed vocational and professional personnel, and foreign trade. The sources for these data are the California Board of Equalization, California Department of Consumer Affairs, and the US Bureau of the Census, respectively.

SECTION L

BANKING AND FINANCE

This section presents bank, savings and loan association, credit union, and finance company statistics. The bank statistics were supplied by the Federal Reserve Bank of San Francisco and the Federal Deposit Insurance Corporation. The savings and loan association statistics were obtained from the Office of Thrift Supervision. Credit union statistics were provided by the California Department of Financial Institutions. Data on finance companies were compiled by the California Department of Corporations. Additional data may be obtained from these sources.

The 1992 Economic Census on California's financial, insurance and real estate industries is also shown.

The 2002 Economic Census is also available and is presented in Section Q of this report. It is based on a new industrial classification system. As a result, comparison between census years may not be possible.

Census reports are issued by the US Department of Commerce, Bureau of the Census.

SECTION O ELECTIONS

Information relating to registrations and voting is presented in this section. In the interest of space, the data are limited to registrations by principal political parties, the total votes cast, and a statement of the vote for major candidates at the Primary and General Elections. A complete accounting of registrations, the vote for all candidates (including representatives in Congress, State senators, assemblymen, and judicial officers) and the votes cast for and against all ballot propositions is given by the Secretary of State in Statement of Vote, a booklet issued after each primary and general election.

SECTION Q

2002 ECONOMIC CENSUS

Data on various California industries are summarized from the 2002 Economic Census. Be aware that a major change has occurred in the way industries are classified for statistical tabulations. Earlier Economic Census reports were based on the Standard Industrial Classification (SIC) system. The 1997 and 2002 Economic Census are based on the new North American Industry Classification System (NAICS). See table on next page for structure comparison. This change resulted in a significant loss of many of the existing time series formed using the SIC. The official source for these data is the US Department of Commerce, Bureau of the Census.

Background

Over the years, the economy of the United States has shifted from an agricultural based economy, to a manufacturing economy, and now to a service based economy. In the 1930s, in order to better understand the industrial composition and the changes taking place in the U.S. economy, an industrial classification system, referred to as the Standard Industrial Classification (SIC) system, was developed. The SIC system provided a consistent framework for the assignment of unique industry codes to each business firm and the subsequent collection, tabulation, and analysis of economic statistics by governments, researchers, and businesses. During the intervening decades, the SIC system has been updated on a periodic basis. While the current SIC system adequately reflects the manufacturing economy, it provides insufficient detail to analyze the services sector of the economy. Recent developments in information services, new forms of healthcare provision, and even high-tech manufacturing can not be studied under the current SIC system. In order to address the data needs of a changing world, the SIC system has been carefully reconceptualized. The new North American Industry Classification System (NAICS) not only represents the first major revision of the industrial classification used in the United States since the 1930s, but also represents a cooperative effort between the United States, Canada, and Mexico to develop a uniform coding structure which could be used by all three countries. The NAICS will allow the collection and analysis of trade and production data directly with our trading partners in NAFTA.

Principles of the NAICS

The old SIC system was a mixture of concepts. Some industries were based on demand groupings, activities that were similar in the eyes of users, while others were based on supply groupings. The new NAICS is the first industrial classification system in the United States to use a unified economic concept to define industries. The production function or supply based definition of industries classifies establishments using similar raw material inputs, capital equipment, and labor in the same industry. This approach creates homogeneous groupings that are well suited for economic analysis. There are four primary concepts that were used during the NAICS development. First, the NAICS was developed using a production oriented conceptual framework. As described earlier, establishments that do things in a similar way will be classified together. Second, new industries in the NAICS focused on emerging economic activities, services in general, and industries producing advanced technology. Third, time series were maintained whenever possible. However, because of national differences in the old coding systems of the United States, Canada, and Mexico and changes to make them comparable, there will be significant time series breaks from the SIC to the NAICS. Finally, the NAICS strove for compatibility with the 2-digit level of the International Standard Industrial Classification of All Economic Activities, Revision 3 (ISIC Rev. 3) of the United Nations.
